1/1950 - 7/2009**

**Jefferson Parish Severe Hail Events
1/1950 - 7/2009**

**Jefferson Parish Severe Hail Events
1/1950 - 7/2009**

Total number of hail events: 46
 Largest hail stone in the database: 3.0 inches (4/6/1964)
 Costliest hail storm in the database: \$65 million (1/23/2000)

1/23/2000 - An intense thunderstorm produced a long swath of destructive hail extending from Metairie in northern Jefferson Parish southeast across much of New Orleans in Orleans Parish to Chalmette in St. Bernard Parish. The hail ranged in size from pennies (0.75") to golf balls (1.75") and covered the ground in many locations. The rare hailstorm caused widespread damage to roofs, windows, and vehicles resulting in nearly 25,000 auto and home insurance claims that were estimated to cost \$65 million.

5/10/2004 – A severe thunderstorm produced golf ball sized (1.75") hail across portions of Metairie including the Elmwood area.

**Jefferson Parish Severe Wind Events
1/1950 - 7/2009**

**Jefferson Parish Severe Wind Events
1/1950 - 7/2009**

Total number of wind events: 116
 Highest wind speed in database: 97 knots (10/13/2001)
 Costliest wind event in database: \$500K (9/10/1993)

10/13/2001 - Thunderstorm winds blew off the roof of a hotel and mobile home, damaged several camps, and knocked down telephone poles, power lines and trees. The Coast Guard station measured a wind gust of 112 mph. The event happened during the late afternoon.

1/17/2004 – In Metairie, thunderstorm winds ripped the roof off of two apartments, partially removed the roof of another apartment, damaged eight houses, and snapped trees and utility poles causing \$350K in damage. The event happened in the mid afternoon.

5/24/1997 - A line of thunderstorms moved across southeast Louisiana. In Waggaman, strong thunderstorm winds overturned an inflatable carnival amusement ride injuring three children.

Total number of deaths from tornado events: 46
 Total number of injuries from tornado events: 69
 Deadliest tornado event in database: 3 deaths (4/8/1993)
 Costliest tornado event in database: \$50M (4/8/1993)

4/8/1993 - A waterspout made moved inland near the middle of Grand Isle on the Gulf of Mexico side about 1320 CST. The tornado continued west-southwest across the middle of the island before exiting into Caminada Bay then making landfall at Cheniere Caminada where it dissipated. The tornado caused an estimated 50 million dollars in damage. The tornado killed 3 people and injured 39 others.

2/13/2007 - A tornado moved along a northerly path from Lapalco Boulevard to the Mississippi River roughly following Avenue C and Avenue D. Significant damage was observed to residential and commercial structures that indicated an intensity in the mid to upper range of an EF 2 tornado on the Enhanced Fujita Scale with winds estimated to be in the 125-130 mph range. Some of the most impressive structural damage observed was to an older, two story motel building which had its roof removed and a portion of the second floor walls caved in. The tornado later crossed the Mississippi River into Orleans Parish. The tornado destroyed 23 houses and damaged 231 others in Jefferson Parish, injuring 9 people in the process.
